## TO WHOM IT MAY CONCERN

I confirm that, in my capacity as Financial Director of Heartland Properties (Pty) Ltd and subsequently Managing Director of Acacia Real Estate (Pty) Ltd, my business relationship with Knutton Consulting ("KC") and more specifically Simon Knutton, started in 2006 when KC were appointed by Heartland Properties as Consulting Engineers. Our relationship has continued to date.

Some of the projects undertaken by KC are as follows:

- Design and detail of Founders Hill Extensions 1-7, inclusive of Outline Scheme Reports and Detailed Services designs;
- Bulk services evaluation of the existing Founders Hill Township;
- Development of Founders Hill Erf 18;
- Bulk Planning of sewer, water and stormwater management for the entire Longlake township;
- Design, detail and supervision of the extension of Marlboro Drive (M60);
- Strategic modeling of long term water and sewer demand for inclusion in the Johannesburg Water GIS model;
- Founders Hill Erven 17, 19 20 and 21 Scheme reports and access studies;
- Services reports for the future Pinelands node;
- Coal Bunker upgrades;
- Centenary Way and connecting roads – R43m budget;
- Numerous strategic and outline services reports for developments in the Modderfontein land holdings; and
- Design and implementation of remedial works in respect of the road network at Umbogintwini, KZN.

I have always found KC to be of a high moral and ethical standing, and their work of a high professional standard, often producing novel, cost effective ways to resolve engineering problems. I have no hesitation in recommending KC as Professional Consulting Engineers, and it is a pleasure to be associated with them.

Yours sincerely

**Neil Hayes**  
Managing Director
